### **Job Posting Title**

Project Controls Specialist Sr

### **Job Posting Summary**

Do you have a passion for financial reporting and analysis? Are you excited by crunching the numbers on large, sophisticated data sets and digging into the root cause? If so, then we have a job for you! The Project Controls group is responsible for oversight and reporting for over 300 PMO led projects at LCRA! We work with each of the Project management groups and areas across the organization to help deliver accurate reporting and drive business decisions.

### **Job Posting Details**

#### You will be trusted to:

We are looking for someone that has a strong background in project financial analysis and reporting. We need a person who can analyze large portfolios of projects monthly and provide relevant performance to plan and trending information.

- Develops and maintains project financial analysis tools
- Oversees and reports on project and portfolio costs and accounting.
- Collects and analyzes metrics and integrates the analysis into relevant reporting that improve the overall operations of the PMO.
- Enables a consistent reporting structure across PMO and multiple business units
- Perform portfolio and project level financial analysis and reporting, research and report on variances and historic trends, and perform quality reviews on the portfolio of projects. This position will work across all business lines.

#### You qualify with:

- Nine or more years of experience in project management, project controls, engineering, or work package management.
- A degree(s) in project management, business, finance, economics, engineering, mathematics, science, computer science, or relevant field may be substituted per LCRA guidelines for certain years of experience.

#### You are a great fit with:

- Strong analytical skills, including the ability to abstract key trends and issues from complex, detailed information
- Advanced skills in Microsoft Excel
- Experience in a business analyst role
- Experience in Process Improvement
- Experience in civil-construction projects and/or IT projects
- Experience with Financial & project management tools (Primavera P6. PeopleSoft Financials)
